

KISHAN RANA GHOSH

Software Engineer

PERSONAL PROFILE

I'm Kishan Rana Ghosh, a BS Degree student at IIT Madras and a developer who enjoys building products that solve real problems. I mainly work on full-stack and mobile applications, with a strong interest in backend systems, real-time architecture, and scalable app development.

Currently looking for opportunities to learn, collaborate, and grow through impactful engineering work.

SKILLS AND EXPERTISE

- Data Structures & Algorithms
- Full-Stack Development
- Backend Engineering
- REST & gRPC API Development
- Microservices & Event-Driven Architecture
- Database & Distributed Systems
- Cloud, Docker & DevOps
- Agentic Systems

LANGUAGES

- English (Fluent)
- Bengali (Fluent)
- Hindi (Fluent)

EDUCATIONAL HISTORY

BS in Data Science and Application

IIT Madras | 2024 – 2028

- Built Venthen as a college project, designing a scalable microservice-based platform for campus management, attendance, real-time communication, and role-based access control.

WORK EXPERIENCE

Blogrator Web Service (OPC) Pvt. Ltd.

Software Engineer | 2025 - Present

- Developed and implemented core features for a web-based Project Management System, enabling project, task, and team management workflows.
- Contributed to the development of an Agentic System, implementing AI-driven workflows to automate tasks and support intelligent decision-making.

PROJECTS

Venthen & Venthen Space (Multi-Tenant Campus Management & Attendance Platform).

- Built backend services using TypeScript, Node.js, Express, PostgreSQL, Redis, Kafka, gRPC, and Docker, with a focus on scalable microservice architecture.

Media Processing Pipeline — NPM Package

- Developed a configurable media processing pipeline for handling video uploads, transcoding, resolution management, HLS generation, and automated local storage cleanup.
- Integrated Cloudinary and AWS S3.
